Our Brief History

Beyond High School was founded on February 14, 1976 by **Beyond Foundation** with the aim of educating the nation's life and advancing general welfare in order to participate in realizing a just and prosperous society both spiritually and materially.

Our Major

Software Engineering

Explore ways of software development including creation, maintenance, management of software development organizations and quality management.

Accounting

Study material related to recording methods and preparation of financial reports that are useful for assisting stakeholders in the decision-making process

Multimedia

Learn about using computers to present text, sound, image, animation, and video data that are made as attractive as possible

★ Our Vision

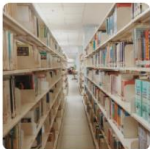

Excellent in producing a professional middle-level workforce and mastering information technology

≡ Our Mission

- Carry out learning, guidance and training so as to produce professional, independent and highly dedicated graduates.
- Providing services to the community and the industrial world through satisfying business and management education.
- Improve the quality of teacher professionalism

Tricks to Choose Your Lens

This is a difficult question to answer in just a few lines and, if you want to make a thorough choice, there are many parameters to learn about and take into account when choosing your camera lens. All of them, whether Canon and Nikon, or other third-party brands, have their own characteristics and it will be necessary to know them to make the right choice/best choice

General Terms in Taxation

Taxation is a term for when a taxing authority, usually a government, levies or imposes a financial obligation on its citizens or residents. Paying taxes to governments or officials has been a mainstay of civilization since ancient times. The term "taxation" applies to all types of involuntary levies, from income to capital gains to estate taxes. Though taxation can be a noun or verb,

What is Programming

Programming is a way to "instruct the computer to perform various tasks". "Instruct the computer": this basically means that you provide the computer a set of instructions that are written in a language that the computer can understand. The instructions could be of various types. Just like we humans can understand a few languages (English, Spanish, Mandarin, French, etc.),
